Key Highlights

Advances in Continuous Drug Substance Manufacturing

Dive into the evolving landscape of continuous drug substance manufacturing, with a focus on new chemical entities (NCEs), biologics, and other emerging compounds. Gain insights from experts shaping the future of drug development.

Advances in Continuous Drug Product Manufacturing

Explore the latest breakthroughs in continuous drug product manufacturing, covering a spectrum of delivery methods, including oral dosage forms (ODFs), inhaled products, and parenteral formulations. Discover innovations shaping the pharmaceutical delivery landscape.

Continuous Manufacturing of Nano-Structured Systems

Delve into the fascinating realm of continuous manufacturing of nano-structured systems. Explore how nanotechnology is revolutionizing drug development and production, paving the way for more efficient and targeted therapeutic interventions.

Modeling, Simulation and Machine Learning

Uncover the latest advancements in modeling, simulation, and machine learning applications in pharmaceutical manufacturing. Learn how cutting-edge technologies are transforming the industry and optimizing processes.
